JEWISH POPULATION ESTIMATES OF SELECTED CITIES

DESPITE the fact that estimates of the numbers of Jews in the different communities of the United States—derived as they are from guesses by informed community persons or from more or less well-constructed population surveys—must often be used with much circumspection, they are nevertheless frequently essential for various communal purposes. An alphabetical listing of such estimates in 720 communities with Jewish populations over 100 was published in Volume 50 of the *AMERICAN JEWISH YEAR BOOK*, together with a list of communities with 1,000 or more Jewish population arranged by region, state, and county. These estimates, it will be recalled, were obtained from the files of the United Jewish Appeal (UJA); from surveys conducted by the Bureau of War Records of the National Jewish Welfare Board (JWB); from the files and field reports of the Council of Jewish Federations and Welfare Funds (CJFWF); and 152 responses to a questionnaire on population estimates prepared by Sophia M. Robison and mailed to member agencies of the CJFWF.

Persons making use of these lists have indicated, however, a preference for an arrangement by city and state. It was felt that this enhances the usefulness of the lists, since so much communal work is organized on state-city rather than county lines. In view of these many requests, the following tabulation has been prepared. Wherever possible, the most recent population estimate has been substituted for the one published in Volume 50. For the complete list of communities with Jewish populations over 100, the reader is referred to Volume 50.
