

THIS PUBLICATION IS PROVIDED BY THE NORTH AMERICAN JEWISH DATA BANK WITH PERMISSION FROM THE STUDY AUTHORS.

THE NORTH AMERICAN JEWISH DATA BANK IS A COLLABORATIVE PROJECT OF UNITED JEWISH COMMUNITIES AND THE UNIVERSITY OF CONNECTICUT'S CENTER FOR JUDAIC STUDIES AND CONTEMPORARY JEWISH LIFE AND ROPER CENTER FOR PUBLIC OPINION RESEARCH. OUR MISSION IS TO:

PROVIDE EMPIRICAL SURVEY DATA SETS ABOUT THE NORTH AMERICAN JEWISH COMMUNITY, FROM NATIONAL AND LOCAL SOCIO-DEMOGRAPHIC STUDIES AS WELL AS OTHER TYPES OF CONTEMPORARY AND HISTORICAL SOCIAL SCIENCE RESEARCH.

MAKE AVAILABLE SUBSTANTIVE AND METHODOLOGICAL REPORTS ON THE JEWISH COMMUNITY, IN PARTICULAR, REPORTS BASED ON DATASETS THAT ARE PART OF THE ARCHIVE.

PROMOTE THE DATA BANK TO JEWISH FEDERATIONS, COMMUNAL ORGANIZATIONS, FOUNDATIONS AND OTHER GROUPS INTERESTED IN RESEARCH CONCERNING JEWISH LIFE IN NORTH AMERICA.

ENCOURAGE ACADEMICIANS, STUDENTS, COMMUNAL PROFESSIONALS AND OTHERS TO UTILIZE DATA BANK HOLDINGS AND TO MAKE THEIR STUDIES A PART OF THE ARCHIVE.

SPONSOR SEMINARS AND PROVIDE OTHER OPPORTUNITIES FOR RESEARCHERS AND PLANNERS TO DISCUSS ISSUES, IMPROVE METHODOLOGIES AND EXCHANGE IDEAS BASED ON QUANTITATIVE RESEARCH.

PREPARE PUBLICATIONS AND OTHER FORMS OF INFORMATION DISSEMINATION CONCERNING SOCIAL SCIENTIFIC RESEARCH ABOUT NORTH AMERICAN JEWRY.

PROVIDE TECHNICAL ASSISTANCE AND ADVICE TO FEDERATIONS, RESEARCHERS, COMMUNAL PROFESSIONALS, JOURNALISTS AND OTHERS INTERESTED IN RESEARCH ON THE JEWISH COMMUNITY.

PLEASE NOTE THAT OUR DATA AND REPORTS ARE PROVIDED FOR NON-COMMERCIAL USE ONLY.

Demographic

Jewish Population in the United States, 1978

THE ESTIMATE of the United States "Jewish Population"* for 1978 is 5,781,000, virtually the same as that reported in 1977 (5,776,000); however, certain regional shifts are evident. In 1978, Jews residing in the Northeast and North Central States comprise 70.9 per cent of the total; in 1977 the figure was 72.2 per cent. The South and West account for 29.1 per cent of the total Jewish population in 1978; in 1977 these regions contained 27.8 per cent of the whole. The two states showing the greatest increase in the South and West, respectively, are Florida and California. A revised upward estimate for the Washington, D.C. area raises the figures for the District of Columbia, Virginia, and Maryland.

Local Jewish federations serve as the primary source for the community estimates shown in Table 3. Cities marked with an asterisk provided such estimates either in 1978 or 1977.

In the past, estimates for non-federated communities were based on data obtained from the national United Jewish Appeal's field staff. UJA, however, has not been updating these data. In an effort to verify the figures which have been published in the AJYB, questionnaires were sent to synagogues in those areas where population changes were thought likely to have occurred. Such changes, where reported, are included in this year's table. The process of verifying the estimates for all non-federated communities will be completed next year.

The state totals shown in Table 1 are the sum of the individual community estimates, excluding duplicate listings and out-of-state figures where a community extends across state boundaries. Also included are communities with less than 100 Jews (not shown in Table 3).

The estimates reported in Table 3 take into account the fund-raising and service areas of the federations located in the cities listed. These areas are often larger than the political boundaries of the cities, but are usually smaller than what the Census Bureau defines as a metropolitan area. In most cases, federation fund-raising and

*Represents the number of individuals in households in which one or more Jews reside, and therefore includes non-Jews living in such households as a result of intermarriage, etc. For a discussion of this, see AJYB, 1974-75, Vol. 75, pp. 296-297.

service areas come closest to the Census definition of an urban area, encompassing the city itself and the more densely populated surrounding areas. Further information with regard to the areas covered is provided in footnotes.

While national, regional, and state totals are presented, it should be emphasized that they are only estimates. There is a good deal of variation with regard to the accuracy of the figures. Some communities have conducted recent population studies, and their totals may be considered relatively close to what a current census would reveal. Other communities rely on estimates based on federation contributor lists and certain assumptions with regard to unaffiliated Jews. It is likely that communities experiencing Jewish population growth will take note of it in population estimates more quickly than communities suffering Jewish population loss.

New York City is a special case in that a change in its population estimate could seriously affect the national total. The figure cited is that given in the 1970 National Jewish Population Study.

Annual Census Bureau reports on changes in general population levels are based on birthrates, deathrates, and net migration figures. None of these elements is available for a discussion of shifts in Jewish population. Since there is no question on religion in the U.S. Decennial Census, this source provides no data for Jewish population estimates. The 1970 National Jewish Population Study arrived at a total population estimate quite close to the one published that year in the AJYB. The NJPS found that the number of Jews in the United States had leveled off; it predicted no significant shift within the next decade. The estimates carried in recent AJYB volumes do not contradict this projection.
