

THIS PUBLICATION IS PROVIDED BY THE NORTH AMERICAN JEWISH DATA BANK WITH PERMISSION FROM THE STUDY AUTHORS.

THE NORTH AMERICAN JEWISH DATA BANK IS A COLLABORATIVE PROJECT OF UNITED JEWISH COMMUNITIES AND THE UNIVERSITY OF CONNECTICUT'S CENTER FOR JUDAIC STUDIES AND CONTEMPORARY JEWISH LIFE AND ROPER CENTER FOR PUBLIC OPINION RESEARCH. OUR MISSION IS TO:

PROVIDE EMPIRICAL SURVEY DATA SETS ABOUT THE NORTH AMERICAN JEWISH COMMUNITY, FROM NATIONAL AND LOCAL SOCIO-DEMOGRAPHIC STUDIES AS WELL AS OTHER TYPES OF CONTEMPORARY AND HISTORICAL SOCIAL SCIENCE RESEARCH.

MAKE AVAILABLE SUBSTANTIVE AND METHODOLOGICAL REPORTS ON THE JEWISH COMMUNITY, IN PARTICULAR, REPORTS BASED ON DATASETS THAT ARE PART OF THE ARCHIVE.

PROMOTE THE DATA BANK TO JEWISH FEDERATIONS, COMMUNAL ORGANIZATIONS, FOUNDATIONS AND OTHER GROUPS INTERESTED IN RESEARCH CONCERNING JEWISH LIFE IN NORTH AMERICA.

ENCOURAGE ACADEMICIANS, STUDENTS, COMMUNAL PROFESSIONALS AND OTHERS TO UTILIZE DATA BANK HOLDINGS AND TO MAKE THEIR STUDIES A PART OF THE ARCHIVE.

SPONSOR SEMINARS AND PROVIDE OTHER OPPORTUNITIES FOR RESEARCHERS AND PLANNERS TO DISCUSS ISSUES, IMPROVE METHODOLOGIES AND EXCHANGE IDEAS BASED ON QUANTITATIVE RESEARCH.

PREPARE PUBLICATIONS AND OTHER FORMS OF INFORMATION DISSEMINATION CONCERNING SOCIAL SCIENTIFIC RESEARCH ABOUT NORTH AMERICAN JEWRY.

PROVIDE TECHNICAL ASSISTANCE AND ADVICE TO FEDERATIONS, RESEARCHERS, COMMUNAL PROFESSIONALS, JOURNALISTS AND OTHERS INTERESTED IN RESEARCH ON THE JEWISH COMMUNITY.

PLEASE NOTE THAT OUR DATA AND REPORTS ARE PROVIDED FOR NON-COMMERCIAL USE ONLY.

FOR MORE INFORMATION, PLEASE VISIT OUR WEBSITE AT

Jewish Population in the United States, 1980

THE NUMBER of persons in Jewish households* for 1980 is estimated at 5,920,900, a modest increase over the previous figure of 5,860,900. The South and West continue to show gains. This year they comprise 31.1 per cent of the total, compared with 28.5 four years ago. The largest increase was reported (based on a formal population study) by Los Angeles. Other communities showing gains of 2,000 or more are Atlanta, Ft. Lauderdale, Las Vegas, San Diego, and Tucson. The Northeast and Northcentral states account for 68.9 per cent, down from 71.4 four years ago. This trend is expected to continue, as many of the older cities in these regions have not fully reported their population losses.

The U.S. Census Bureau identifies Jews as a religious rather than an ethnic group. Since there is no question on religion in the decennial census, this source provides no data for Jewish population estimates.

The community estimates listed in Table 3 are provided primarily through an annual survey of local Jewish federations. There is variation with regard to the accuracy of the figures. While some communities conduct formal population studies, others estimate roughly on the basis of lists of known Jewish households. Several federations have indicated that their reported estimates are actually dated, but these communities are reluctant to revise their figures without undertaking formal studies. Other communities show fluctuations from year to year. A case in point is Denver, which reported a significant increase in 1979, but which this year reverted to the 1978 estimate pending a planned population study.

In Florida some communities have a problem estimating their population count because of seasonal residents. Such residents may be counted twice, once in the Florida community and again in the original home community to which they return for part of the year. Ft. Lauderdale has indicated that next year it plans to revise its estimate on the basis of a more limited inclusion of seasonal residents.

*Most Jewish communities estimate their population size by multiplying the number of families with the average size of household. A result of this procedure is to include, as a consequence of intermarriage, non-Jews living in households with one or more Jews. The 1970 National Jewish Population Study estimated the per cent of non-Jews in "Jewish households" as 7.4. For a fuller discussion of this, see AJYB, Vol. 75, 1974-75, pp. 296-299.

Approximately five per cent of the total Jewish population resides in non-federated communities. The process of contacting all such communities, through questionnaires sent to synagogues, begun in 1978, was completed this year. Follow-ups to non-responding localities will continue next year.

National, regional, and state totals, shown in Tables 1 and 2, are derived by summing the local community estimates. While these totals are presented, it should be emphasized that they are reported only as estimates. State totals exclude duplicate listings and out-of-state figures, where a community extends across state boundaries. Communities with less than 100 Jews (not shown in Table 3) are also included, as is an estimate for unreported Jews (generally in areas having no local synagogue). The latter figure is put at 25,000, or less than one-half of one per cent of the national total. This figure is calculated by doubling the number of Jews in communities reporting less than 100 Jewish residents.

The New York City metropolitan area figure, currently estimated at more than one-third the total Jewish population of the United States, represents the greatest source for potential modification of the national total. The estimate cited in Table 3—1,998,000—is that given in the 1970 National Jewish Population Study. It includes the city proper and three suburban counties. As stated in last year's article, the city proper has probably experienced significant Jewish population loss. The magnitude of the population shift to New York City suburbs and to areas outside Greater New York is unknown. The problem is further compounded by lack of current estimates for areas contiguous with metropolitan New York, i.e., Rockland County in New York State and Bergen County in New Jersey. Finally, the extent to which probable New York City losses are offset by immigration of Soviet Jews and Israelis is also unknown. The latter group is difficult to define, and probably includes a large temporary resident population. The New York Federation of Jewish Philanthropies is planning to sponsor a study, hopefully to be conducted in 1981, which would provide a more accurate population count than is now available.
