

THIS PUBLICATION IS PROVIDED BY THE NORTH AMERICAN JEWISH DATA BANK WITH PERMISSION FROM THE STUDY AUTHORS.

THE NORTH AMERICAN JEWISH DATA BANK IS A COLLABORATIVE PROJECT OF THE JEWISH FEDERATIONS OF NORTH AMERICA AND THE UNIVERSITY OF CONNECTICUT'S CENTER FOR JUDAIC STUDIES AND CONTEMPORARY JEWISH LIFE AND ROPER CENTER FOR PUBLIC OPINION RESEARCH. OUR MISSION IS TO:

PROVIDE EMPIRICAL SURVEY DATASETS ABOUT THE NORTH AMERICAN JEWISH COMMUNITY FROM NATIONAL AND LOCAL SOCIO-DEMOGRAPHIC STUDIES AS WELL AS OTHER TYPES OF CONTEMPORARY AND HISTORICAL SOCIAL SCIENCE RESEARCH.

MAKE AVAILABLE SUBSTANTIVE AND METHODOLOGICAL REPORTS ON THE JEWISH COMMUNITY, IN PARTICULAR, REPORTS BASED ON DATASETS THAT ARE PART OF THE ARCHIVE.

PROMOTE THE DATA BANK TO JEWISH FEDERATIONS, COMMUNAL ORGANIZATIONS, FOUNDATIONS AND OTHER GROUPS INTERESTED IN RESEARCH CONCERNING JEWISH LIFE IN NORTH AMERICA.

ENCOURAGE ACADEMICIANS, STUDENTS, COMMUNAL PROFESSIONALS AND OTHERS TO UTILIZE DATA BANK HOLDINGS AND TO SUBMIT THEIR STUDIES TO THE ARCHIVE.

SPONSOR SEMINARS AND PROVIDE OTHER OPPORTUNITIES FOR RESEARCHERS AND PLANNERS TO DISCUSS ISSUES, IMPROVE METHODOLOGIES AND EXCHANGE IDEAS BASED ON QUANTITATIVE RESEARCH.

PREPARE PUBLICATIONS AND OTHER FORMS OF INFORMATION DISSEMINATION CONCERNING SOCIAL SCIENTIFIC RESEARCH ABOUT NORTH AMERICAN JEWRY.

PROVIDE TECHNICAL ASSISTANCE AND ADVICE TO JEWISH FEDERATIONS, RESEARCHERS, COMMUNAL PROFESSIONALS, JOURNALISTS AND OTHERS INTERESTED IN RESEARCH ON THE JEWISH COMMUNITY.

PLEASE NOTE THAT OUR DATASETS AND REPORTS ARE PROVIDED FOR NON-COMMERCIAL USE ONLY.

## Notes for 2000 estimations

California: Los Angeles. The *Los Angeles Jewish Population Survey '97* provides estimates of Jewish populations in five areas: Metro, Western, Southern, Valley Alliance-Central, and Valley Alliance-Simi/Conejo. These regions were matched to 15 congressional districts to calculate the estimates for this project. The Los Angeles estimates include adjustments to account for demographic shifts of the Jewish population from the Metro region to the Western and Southern regions: Metro estimates were decreased by 12 percent, and estimates for the Western and Southern regions were increased by 20 and 10 percent, respectively.

California: San Diego. The *Demographic Study of the San Diego Jewish Population 2003* provides population data for 6 regions (South County, Central San Diego, Greater East San Diego, La Jolla, North County Coastal, and North County Inland). The study also provides the corresponding ZIP codes for each region, but not population figures by ZIP codes. The ZIP codes were used to calculate the percentage reach region in the 5 congressional districts that represent San Diego County.

California: San Francisco. The *2004 Jewish Community Study of San Francisco, the Peninsula, Marin and Sonoma Counties* provides estimates of Jewish populations for 5 regions represented by 5 congressional districts. The regions were matched to the 5 districts to calculate the estimates for this project. Population estimates for 2000 were adjusted to reflect the growth of the Jewish community between 1986 and 2004. The estimates for 2000 were as follows: Marin County, 22000 Jewish persons; Sonoma County, 18000 Jewish persons; San Francisco County, 5500 Jewish persons; North Peninsula Region, 30000 Jewish persons; and South Peninsula Region, 45000 Jewish persons.

Georgia: Atlanta. Population estimates are based on the ZIP code data used in the *Jewish Community Centennial Study of Greater Atlanta 2006*. The Atlanta Jewish community grew from 76,800 in 1996 to nearly 120,000 in 2006. Data figures were adjusted to reflect an estimated 93,500 Jewish persons in the state of Georgia in 2000.

Michigan: Detroit. A 1999 study estimated there were 78,000 Jews in the Detroit area. The *2005 Detroit Jewish Population Study* estimated there were 72,000 Jews in the Detroit area, and the study provided ZIP code data for the 78,000 individuals who live in Jewish households. These household data were used in the calculations for 2000.

Nevada: Las Vegas. The Las Vegas Jewish community has grown rapidly over the past decade, increasing from 55600 in 1995 to 67500 in 2005. For the purposes of this report, I estimated the population to be 61550 in 2000 and adjusted the 2005 ZIP code data accordingly.

New York: New York City calculations include a 3.64% adjustment to account for missing ZIP code data.

Ohio: Cleveland. The *Jewish Cleveland 2005 Demographic Profile* provides population data for 6 regions represented by 4 congressional districts. The regions were matched to the 4 districts to calculate the estimates for this project.

Ohio: Columbus. The *2001 Report for the Columbus Jewish Federation Survey* provides population data for 4 regions represented by 2 congressional districts. The regions were matched to the 2 districts to calculate the estimates for this project.

Washington. The *Greater Seattle Jewish Population Survey 2000* provides estimates of Seattle area Jewish populations in several regions of King County (Eastside, Seattle South, Seattle North End, and Other Areas). These regions were matched to congressional districts to calculate the estimates for this project.
